## Interregional Innovation Investments (I3)

Information category	Description
Programme name	Interregional Innovation Investments (I3) Instrument Strand 1 - Financial and advisory support for investments in interregional innovation projects
Objective(s) and scope	The Interregional innovation investments instrument, as part of the European Regional and Development Fund (ERDF), is design to foster innovation through Smart Specialisation and interregional cooperation. It provides support to interregional innovation projects during their commercialisation and scale-up stages, equipping them with the necessary tools to navigate regulatory and other barriers and bring their project to investment level.
	The support focuses on two strands:
	<ul> <li>Financial and advisory support for investments in interregional innovation projects</li> </ul>
	<ul> <li>Financial and advisory support to the development of value chains in less developed regions</li> </ul>
	Strand 1 – Financial and advisory support for investments in interregional innovation projects, which targets mature partnerships to help them accelerate market uptake and scale-up of innovative solutions in shared smart specialisation priority areas, as well as to develop a portfolio of investment projects.
