

# NEW EU DRIVING LICENCE on its way

## What to expect

1 March 2023

**Accompanied driving**  
for learner drivers as of 17

**Zero drink-driving tolerance**  
for novice drivers

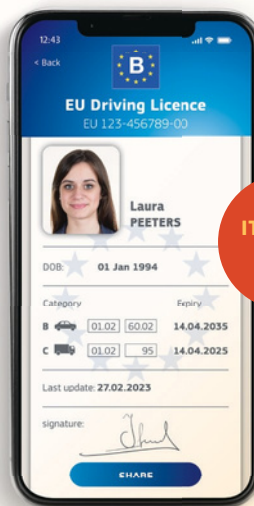

**Young drivers are over-represented in fatal crashes**

Young drivers represent  
**8%**  
of all car drivers...

...but  
**16%**  
of all driver fatalities.

**Green transition:**  
the permitted mass of a 'B' category vehicle will be increased for zero-emission vehicles as they are heavier

**WHAT IT COULD LOOK LIKE**

Tests that prepare future drivers for real-life roads, e.g. for **sharing roads with cyclists, e-scooters, etc. & automated driving**

**Cross-border offences**

- Enforced
- Offender not identified
- Payment not enforced

More than **40%** of non-resident drivers committing offences **pay no penalty**

**EU-wide digital driving licence:**  
a world first, the EU will have an e-licence valid across borders

Measures to ensure drivers who break road rules in other EU Member States **face the consequences**
