# **Mobilizing finance for multi-modal corridors between the EU and Western Balkans**

**Simon Ellis**

March 20, 2018

The most recent estimates for costs to fully develop and rehabilitate the key corridors in the Western Balkans are about **EUR 8 billion over a 5-year period.**, i.e the infrastructure costs are just over EUR 1.5 billion a year.

Improved logistics, custom operations and market access, at the EU levels, with marginal investment, **would lead to possible savings of about 1% of the region's GDP or about EUR 1 billion a year.**
