

**NOTICE OF CALL FOR PROPOSALS  
WITH A VIEW TO OBTAINING GRANTS IN THE FIELD OF TRANSPORT**

**Call for proposals DG TREN/SUB/01-2009**

**1. Policy framework**

The European Commission intends to award grants to promote the objectives of the common transport policy. The policy priorities have been set in the work programme for 2009 adopted by the Commission (COM(2009) 4671 22.06.2009). Information on this call for proposals is available on the DG TREN website at the following address:

[http://ec.europa.eu/transport/grants/index\\_en.htm](http://ec.europa.eu/transport/grants/index_en.htm)

**2. Sources of funding**

The operations selected will be financed from the budget headings 'Support activities to the European transport policy and passenger rights' and 'Transport security'.

**3. Estimated total amount for this call for proposals**

The estimated total amount for 2009 is €4 750 000.

- Road safety: €4 000 000
- Internal Market: €600 000
- Transport security €150 000

**4. Percentage of Community co-financing**

The grants are intended as incentives for carrying out an operation which could not be executed without Community financial support, and they reflect the principle of co-financing. The Commission therefore plans to grant only funds which are complementary and subsidiary to contributions made by the beneficiary, the national, regional or local authorities and other bodies. Accordingly, the amount granted will be between 10% and 50% of the total eligible costs of the operation, except for transport security, where it can be up to 80%. Contributions in kind are not regarded as eligible costs. Operations will compete for possible financial support.

**5. Objectives of this call for proposals:**

Taking into account the legislative initiatives described in the work programme for 2009, the Commission wishes to support operations reinforcing and developing its policies in the field of transport, particularly in the context set in the White Paper 'European Transport policy for 2010: time to decide' and its mid-term review 'Keep Europe moving' adopted in June 2006.

The scope and the results of these operations should enable the Commission to consolidate its initiatives and to renew them on the basis of current economic, social and technological trends within the European Union and beyond.

## 6. Categories and areas of operations covered by this call for proposals:

### 6.1. Categories of operations:

The operations to be supported will be classified as follows, although this does not imply the exclusion of operations having other characteristics and meeting the objectives set out in point 5:

- Research and dissemination of best practices: these operations aim to compare the procedures in force and the equipment used, measure the performance of transport systems and identify the scope for improvement in order to disseminate the best practices within the European Union.
- Coordination and harmonisation of standards and procedures: this concerns increasing the opportunities for convergence between different existing standards and procedures in order to reinforce the harmonisation process at the European level.

### 6.2. Areas covered:

The operations must be devoted to the following areas:

#### **Road Safety:**

- development and implementation of innovative road safety campaigns throughout the European Union; use of original teaching approaches and new information technologies to influence user behaviour in a sustainable manner,
- innovative concepts or the sharing of best practice to ensure road safety as regards two-wheeled motor vehicles: taking greater account of such vehicles in road safety planning and improving understanding and respect among different types of road user,
- innovative concepts or the sharing of best practice as regards vulnerable users (pedestrians and cyclists) in order to offer more attractive and safer solutions to the problems of congestion and pollution, particularly (but not exclusively) in urban areas,
- innovative concepts or the sharing of best practice as regards the elderly (drivers and pedestrians) in a society with a constantly increasing life expectancy: making use of new technologies and the results of medical and sociological research to ensure safe mobility for the elderly,
- the development of benchmarking tools to measure the effectiveness of road safety policies, based on work already carried out at European level, in order to ensure better understanding of the issues at stake and to identify recurring problems, including in countries with a generally better road safety record,
- pilot projects, in particular using new technologies, to standardise procedures.

A proposal may cover several areas of road safety.

For the purposes of sound management, the Commission is envisaging only co-financing projects of a certain scale (a Community contribution of at least €500 000).

#### **Internal market (inland waterways and maritime transport):**

- Creating a network of centres for promoting inland waterway navigation. The objective is to advise transport users at local level and encourage them to use inland navigation by providing logistical solutions, best practices and technical assistance. This measure should help to improve the image and awareness of this mode of transport.
- Definition of a series of objective and concrete indicators of the level of performance of ports and terminals. The quantification of these indicators will enable the socio-economic and environmental impact in the EU to be assessed. These indicators will also permit the basis to be laid for a future European Port Observatory.

### **Transport security:**

- Creation of a network for the exchange of information in order to define and promote harmonised dissemination as regards safety incidents at port and fleet level in the Member States.

## **7 Period of eligibility of costs:**

The Commission is prepared to support multiannual operations of a maximum duration of **36 months**. Eligible costs can be incurred only after signature of the grant agreement by all the parties, save in exceptional cases, and under no circumstances before submission of the application for a grant.

Certain tasks can be subcontracted if the beneficiaries do not intend to carry them out themselves. If so, the rules laid down in Article II.9 of the grant agreement apply. Contracts transferred to subcontractors must cover only a **small part** of these operations. The reasons for subcontracting some of the tasks must be stated. The tasks concerned and an estimate of the relative costs must be set out clearly in the application form.

## **8. Eligibility criteria:**

## 10. **Award criteria**

The operation supported must be designed to further one of the objectives referred to in point 5 above. The Commission will base the choice of operations and the rate of Community co-financing on the following criteria:

### 10.1. *Quality of the operation (80%)*

A. The Commission will assess the **European dimension of the project** and the value added to EU safety policies, in particular those set out in the White Paper 'European transport policy for 2010: time to decide' and its review of June 2006 as well as the ensuing sectoral policies. In this context, local, regional or purely national initiatives are excluded. It will also assess the relevance of the proposal to the priorities set out in point 6.2. (20%).

B. The Commission will assess **the innovative character of the project**, in terms of new approaches presented and new practices developed (20%).

C. **Multiplier effect:** the Commission will assess the value of the project in terms of transfer and generalisation of knowledge and good practice, dissemination or large-scale application of the results as well as the scale of the operation in response to the Commission's priority of supporting large-scale projects (15%).

D. **Cost-effectiveness ratio:** the Commission will assess the cost-effectiveness ratio of the operation and will, to that end, evaluate the expected results in the light of the grant requested (10%).

E. **Visibility:** the Commission will assess the means by which the visibility of the operation on a European Union level will be assured, e.g. through publications, organisation of events, Internet sites, CD-ROMs (15%).

### 10.2. *Presentation of the application (20%):*

The Commission will assess the organisation and proposed execution of the operation, and will assess the detail of the proposal with regard to the following aspects:

A. The **work plan**, including a clear and full description of the means to achieve the goals of the operations, with a detailed financing plan, person-months attributed to specific tasks, and a meaningful and realistic timetable.

B. **Methodology**: The proposers have to present an evaluation method for their project with result indicators for the proposed objectives.

*Only applications with a total score of 70% or higher and of at least 60% for each individual criterion will be taken into consideration for Community funding.*

## 11. General conditions for awarding grants

The general conditions for awarding grants, particularly the definition of the eligible costs and the methods of payment, are set out in the draft grant agreement available at the Internet address mentioned in point 1. Applicants must take note of this document and must take into account the conditions for awarding grants when drawing up their proposal.

For all applications for pre-financing of over €100 000, a financial guarantee equivalent to the amount pre-financed will be required. In addition, the Commission reserves the right to require a financial guarantee for pre-financing amounts of under €100 000.

The budget for the operation attached to the application must have revenue and expenditure in balance and show clearly the costs which are eligible for financing from the Community budget. To this end, applicants must provide a detailed breakdown of all expenditure related to their proposal.

The Commission will only recognise the costs of entities having signed the contract, whether as beneficiary or as co-beneficiary. It will no longer accept the co-financed participation of third parties to the contract, if they are neither beneficiaries nor co-beneficiaries, unless they are subcontractors, the costs of which are taken into account when considering the beneficiaries or co-beneficiaries.

For operations where the cost to be financed by the Commission exceeds €500 000, the application must be accompanied by an external audit report produced by an approved auditor. This report must certify the accounts for the last year available. If this report is not submitted, the proposal will be rejected.

## 12. Submission of the grant application

Applications must be made only using the model **application form available at the Internet address mentioned in point 1**. For each application, **one signed original and five copies** must be supplied by the applicants. Partners must fill in the parts B and C of the application form.

Applicants must also fill in the **form relating to legal entities**, available from the following website: [http://ec.europa.eu/budget/execution/legal\\_entities\\_en.htm](http://ec.europa.eu/budget/execution/legal_entities_en.htm).

Any unsigned applications will be rejected when the tenders are opened.
