Introduction

Interoperability, within the meaning of Directive No. 2016/797 of the European Parliament and of the Council (EU) of 11 May 2016 on the interoperability of the rail system within the Community, represents the ability of the rail system to enable safe and uninterrupted movement of trains which achieve the required level of performance. By ensuring its objectives within the Union's rail system, it is necessary to achieve the setting of an optimal level of technical harmonization and to facilitate, improve and develop the services provided in international rail transport for each passenger and user of the services of railway companies.

The technical specifications for interoperability which serve to meet the essential requirements for ensuring the safety of the rail system imply the obligation to draw up a national plan for their implementation. In order to ensure that the intent to achieve interoperability is met, the Slovak Republic has drawn up a national plan for the implementation of the technical specifications for interoperability relating to the operation and traffic management subsystem and the management of the rail system in the European Union.

1. Approval Part

Pursuant to Article 3d, point 2 of Commission Regulation (EU) 2015/995 of 8 June 2015 amending Decision 2012/757/EU on the technical specification for interoperability relating to the subsystem "operation and traffic management" of the rail system in the European Union, each Member State is required to draw up a national plan for the implementation of these technical specifications for interoperability (hereinafter referred to as TSI). In accordance with this provision, the Ministry of Transport and Construction of the Slovak Republic (hereinafter MTCR SR) has drawn up a national plan for the implementation of TSI relating to the operation and traffic management subsystem. Several consultations with experts in practice were carried out during its creation. This implementation plan should be made available to the Commission as well as to the other Member States.

Processor: Ing. Katarína Magdechová
State Advisor

Approved by: Ing. Ján Farkaš
Director General of the Department of
railway transport and railway infrastructure

2. General Description

Železnice Slovenskej republiky (ŽSR) came into existence by the division of Československé štátne dráhy on 1 January 1993. On 1 January 2002, the first railway transformation took place, when Železničná spoločnosť, a. s. whose activity was personal and freight transport, and ŽSR as the infrastructure manager were established. The second step was the division of Železničná spoločnosť, a. s. as of 1 January 2005, with the formation of Železničná spoločnosť Slovensko, a. s. as a carrier operating a rail passenger service and Železničná spoločnosť Cargo Slovakia, a. s. as a carrier operating rail freight. These companies originated from Železničná spoločnosť, a. s. created during the first transformation stage. The infrastructure manager continues to be ŽSR.

As of 31 December 2016, ŽSR managed and operated lines with a total construction length of 3,626.297 km. The kilometric lengths of the individual tracks are listed in Table No. 1.

Table 1 Managed Tracks

Tracks	km
Single-track	2,609.662
Double-track	1,016.635
Track gauge	
Tracks with a gauge of 1435 mm	3,481.378
Tracks with a gauge of 1520 mm	98.718

Due to the non-compliant technical condition, the operation of 46,692 km of tracks was suspended. Picture no. 1 shows the railway network in the administration of ŽSR.

ŽSR, as the infrastructure manager, operates traffic of different categories and types. The relevant data is shown in Table No. 2

Table 2 The division of lines in terms of traffic management

Operational points	Number of operational points
Railway stations	300
Border transit stations	22
Other operational points (gates, turnouts, passing tracks, stops, transshipment points, crossing gate points, transport according to the regulations of ŽSR Z1 and others)	698
In total:	1,020
<i>Of which (occupied/not occupied with staff):</i>	<i>377/643</i>

Annex No. 1 shows the distribution of lines within the ŽSR network according to the individual sheets of the railways timetable.

3. Characteristics of Railway Companies

In the Slovak Republic, the market for commercial rail transport has been liberalized since 1996. There are several rail carriers providing both passenger and freight services. These activities are carried out by the carriers on the basis of a valid license issued in accordance with European regulations. Several railway companies operating on the railways have been asked to cooperate on the creation of the national implementation plan. A list of valid licenses is published on the website of the Transport Authority, which is also the national safety authority (<http://nsat.sk/>).

Carriers operating in passenger rail transport include:

- Arriva Service, s. r. o.;
- LEO Express, a. s.;
- RegioJet, a. s.;
- Železničná spoločnosť Slovensko, a. s.;
- Wagon Service Travel, s. r. o.

Arriva Service, s. r. o.

The company Arriva Service is focused on long-distance and regional rail transport in the Czech and Slovak Republics. Its aim is to contribute to the liberalization of passenger rail transport. Handicapped persons can use the assistance of the company's personnel for trouble-free boarding. Notification of the transport of disabled persons can be made no later than 48 hours prior to the start of the transport operation.

LEO Express, a. s.

LEO Express, a. s., is a private transport company engaged in personal transport. The first operation was launched at the end of 2012 and is currently operating in 4 different countries. In addition to passenger transport, it also provides additional services such as the rental of headphones and social games, the daily press and free WiFi connection.

RegioJet, a. s.

RegioJet trains provide regular rail passenger services on routes in the Czech Republic and Slovakia. Every passenger is offered free daily press, magazines and drinks. Customers can borrow headphones and connect to the Entertainment Portal for free, where dozens of movies, series or e-books and games are ready for them. There is also free WiFi on the trains.

Železničná spoločnosť Slovensko, a. s. (ZSSK)

ZSSK is a joint-stock company based in the Slovak Republic, established on 13 December 2004 and registered in the Commercial Register of the District Court of Bratislava I as of 1 January 2005. The 100% shareholder is the state, on behalf of which MTCRD SR is acting. The company realizes an average of 1,455 daily train connections, operates services in 69 of the 79 districts of Slovakia, stops at 690 stations and stops in the territory of Slovakia, it is a leader in the provision of passenger rail transport and a member of important European and world institutions.

Wagon Service Travel, s. r. o.

The company Wagon Service travel s. r. o. is a private transport company engaged in passenger transport. In its records, it has 20 couchette cars Bcmh which are equipped for passengers with

limited mobility. There are 9 WLABmee sleeping carriages in its records. The company leases couchette and sleeping cars to ZSSK and České dráhy (ČD).

The largest freight rail transport operators are:

- ZSSK Cargo, a. s.,
- Express Group, a. s.,
- Lokorail, a. s.,
- LTE Logistik a Transport Slovakia, a. s.,
- Metrans, a. s.

ZSSK Cargo, a. s.

The main business activity of Železničná spoločnosť Cargo Slovakia, a. s. is the provision of transport services in rail freight transport. In addition to supplementary services directly related to freight and combined transport, the company provides, as its second major product, services related to the rental of rolling stock, maintenance and repairs.

Express Group, a. s.

As a private rail transport operator, it provides comprehensive services in freight rail transport on the territory of the Slovak Republic and the Czech Republic, secures the operation of transport on national and regional railways, including border crossing stations and railway sidings, including the performance of handling operations.

Lokorail, a. s.

The company is a transport-shipping company, whose main activity is the provision of transport services on national railways and the operation of industrial railways and transport on industrial railways. For its customers, the company can secure the long-term rental of commonly used freight wagons.

LTE Logistik a Transport Slovakia, a. s.

The company focuses on the transport of various kinds of commodities both at home and abroad and also on logistics. It operates on the basis of a valid license. It owns more than 30 electric and diesel locomotives.

Metrans, a. s.

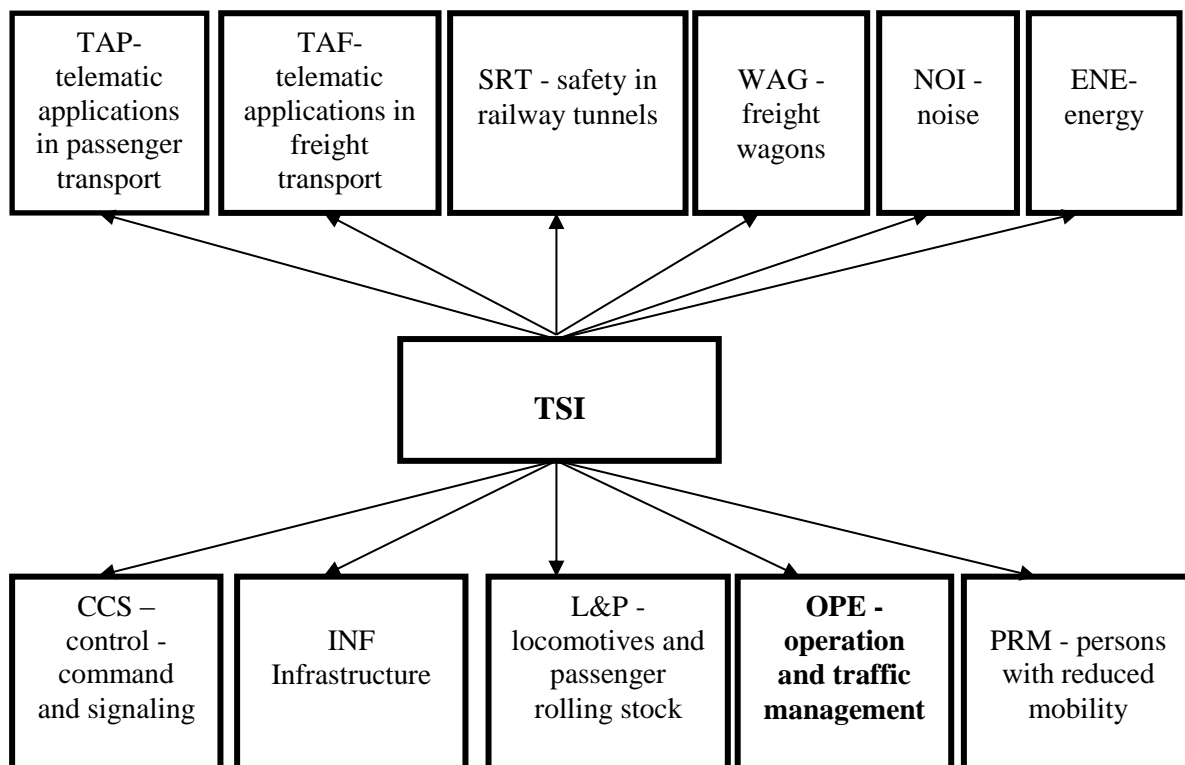

An enterprise mainly engaged in intermodal transport. It uses innovative modern technologies. It provides logistics between ports and terminals of combined transport, the repair and maintenance of locomotives, and so on.

4. Legislative Background

After the accession of the Slovak Republic to the European Union, it was necessary to transpose individual EU legal acts into national legislation. In 2009, a new law No. 513/2009 Coll of the National Council of the SR on railways and on the amendment and supplementation of certain laws was adopted. This Act transposed, inter alia, Directive No. 2008/57/EC of the European Parliament and of the Council on the interoperability of the rail system within the Community and Directive No. 2004/49/EC of the European Parliament and of the Council on safety on the Community's railways. Decree No. 351/2010 Coll. of MTPT SR on the traffic order of railways and MTPT SR No. 350/2010 Coll. on the construction and technical order of the railways became the implementing regulations to Act No. 513/2009 Coll. Decree No. 245/2010 Coll. of the MTPT SR was issued in the field of professional, health and psychological competence of persons in the operation of the railway and transport on the railroad.

Commission Decision 2012/757 of 14 November 2012 concerning the technical specification of interoperability relating to the subsystem "Operation and Traffic Management" of the rail system in the European Union and amending Decision 2007/756 / EC, as amended, and Commission Regulation (EU) 2015/995/EU is fully applicable to railway lines within the territorial scope of this TSI which are put into service as interoperable lines after the entry into force of this TSI. This also includes new, renewed or upgraded railway lines. This Regulation is directly applicable in all Member States and directly applicable by the individual participants. The SR seeks to apply the individual TSIs as much as possible and respect their superiority over national legislation.

Figure 1 TSI list

In order to ensure the interoperability of the railway system, the SR is also bound by the application of EP and Council Regulation (EU) No. 1315/2013 on Union guidelines for the development of a trans-European transport network and Commission Implementing

Regulation 2017/6 on a European roadmap for the development of the European Rail Traffic Management System.

5. Defining the Technical Transition Strategy

The process of upgrading and renewal of railway lines in connection with the OPE TSI should be based on the strategic objectives adopted in the Slovak Republic (e.g. the Strategic Plan for the Development of Transport Infrastructure of the SR by 2020) and the obligations arising from the European legislation and international agreements. Under the national legislation, the following legal acts were notified:

- Act No. 513/2009 Coll. on railways and on amendments and supplements to certain laws,
- Act No. 514/2009 Coll. on railway transport,
- Decree No. 245/2010 Coll. on the professional competence, medical fitness and psychological competence of persons in the operation of railways and railway transport,
- Decree No. 350/2010 Coll. on the construction and technical order of the tracks,
- Decree No. 351/2010 Coll. on order in transport on railway lines,
- Z 1 The rules of railway traffic,
- Z 3 Professional competence at ŽSR.

The application of the national implementation plan is also envisaged to be partially implemented in accordance with the modernization of the lines.

In the Strategic Plan for the Development of Transport Infrastructure of the Slovak Republic by 2020, the railway transport vision was defined in terms of transport policy and the current state of railway transport (see Table 3).

Table 3 Vision

Vision number (VN)	Vision
VZ 1	Balance between transport supply and transport demand
VZ 2	Balance between infrastructure supply and transport demand
VZ 3	To create conditions for the proper functioning of the railways

Source: (2)

The implementation of these visions will be realized through the fulfillment of the partial strategic objectives listed in Table No. 4.

Table 4 Strategic objectives

Strategic objective number	Strategic objective
SO 1	High-quality and competitive passenger rail transport
SO 2	High-quality and competitive freight rail transport
SO 3	Modern and safe railway infrastructure
SO 4	Effective organization and planning for the development of the railways
SO 5	Economically sustainable railway

Source: (2)

These strategic objectives demonstrate that the Slovak Republic is trying to increase the competitiveness of rail transport and to strengthen its position on the transport market as much as possible.

ŽSR ensures uninterrupted and safe operation through its internal regulations, namely:

- Z 1 "Rail Traffic Rules",
- Z 3 "Professional Competence at ŽSR",
- Z 4 "Assessment of Psychological Competence",
- Z 10 "Rules for the Technical Operation of Railway Infrastructure (RTORT)",
- Z 14 "Operating Communications Rules",
- ZS 1 "Operation of Security Devices",
- SR 1003 (D) "Operational Traffic Management at ŽSR",
- SR 1012 "Operating Information System",
- SR 1023 (D) "Creation of Track Route Tables",
- SR 1025 "Creating Tools for the Rail Transport Graphics",
- V 65 "Regulation for the Operation of Flammability Indicators",
- TRT track route tables.

TRT track route tables are available on the ŽSR web site http://www.zsr.sk/slovensky/zeleznicna-dopravna-cesta/marketing/tabulky-tratovych-pomerov.html?page_id=353

These regulations will be discussed in more detail in the chapter on operating regulations. In general, however, it can be stated that the requirements of the OPE TSI have been implemented in the regulations of the ŽSR and their updating is regularly carried out according to the changes in legislation.

6. The Current State of the Subsystem in the SR

The aim of this chapter is to give a brief overview of the current status of the Operation and Traffic Management subsystem and its characteristics in the Slovak Republic.

6.1. Overview of the State of the Subsystem in the SR

The railway infrastructure of the SR is generally characterized by a high network density but a low line speed on the railway lines resulting, among other things, from infrastructure obsolescence. The SR endeavors to meet the requirements for fixed equipment that are necessary to achieve interoperability, thus fully respecting the OPE TSI.

As part of the modernization of the railway infrastructure, the final stage of the implementation of the Transport Operational Program for 2007-2013 was completed in 2014. In the previous year, investment shares were realized in the total amount of 277.111 mil. EUR (in 2013 – 325.4 million. EUR) targeting in particular the modernization of railway infrastructure. Through investments, components of the railway infrastructure were upgraded, namely:

- railway stations
- track superstructure and substructure
- traction lines,
- security devices,
- the construction of railway bridges, etc.

The requirements of the OPE TSI have been implemented in the regulations of the ŽSR. The regulations of ŽSR will be updated after the issue of amendments of the legislation.

The railway infrastructure was operated in a non-discriminatory manner. In 2016, these services were provided by 50 carriers, namely:

- 7 passenger transport operators,
- 39 freight transport operators,
- 4 passenger and freight transport operators.

Traffic management and organization on the railway is provided at ŽSR on 3 levels. In the designated department and shift, only one responsible ŽSR employee is responsible for the management and organization of transport – **the shift manager**.

Figure 2 Diagram of the management and the organization of transport on the railways

3rd level – DG ŽSR	Dispatcher apparatus of ŽSR (central, main dispatcher)	Shift manager – central dispatcher
2nd level – RD	Dispatcher apparatus RD (control, operating, electro- dispatcher)	control dispatcher
1st level – TR	train dispatcher, DOT dispatcher (in designated TS, there may also be an operations supervisor, station dispatcher, etc.)	Shift manager – control dispatcher

A record is kept of the individual activities, which is archived according to the valid regulations. The record is conducted in writing (Traffic log, written orders, etc.) or through KIS (VDS, EDD, PIS, REVOC, GTN, ILTIS, ESA, HAVIS, etc.). For individual KIS systems, manuals are issued to ensure correct operation, data input as well as control and responsibility for proper operation:

- TDS (Train Dispatching System) – for the monitoring and evaluation of train running, interruption, etc.,
- OIS (Operating Information System) – for the "core business" (main activity) of ŽSR in real time – planning, operation and train traffic management, order of routes, management and evaluation of transport processes (RTD) and the like.
- EDD (Electronic Traffic Log) – for conducting transport documentation,
- REVOC (call recording) – call records for employees,
- ILTIS (Integrated Control and Information System) – for the operation of the SIMIS W type switch tower,
- ESA 11 (Integrated Control System of AŽD, Prague s. r. o.) – for the operation of electronic station security equipment,
- HAVIS (voice and visual passenger information system) – for passenger information,
- and other systems not listed here

ZSSK, a. s. also seeks to ensure efficient traffic management that is designed to ensure customer satisfaction. Operational traffic management is carried out through the ZSSK dispatching apparatus, whose main task is to ensure the smooth operation of regular passenger trains in accordance with valid travel timetables as well as extra trains established at the request of ZSSK. The dispatching apparatus of ZSSK records all deficiencies in violation of the regularity of the RPGT, which proceeds to the appropriate OU to investigate the form of operational deviations.

6.2. Overview of the state of the subsystem in SR – Operating rules

The individual operating regulations of ŽSR as well as the national legislation of the SR are not in contradiction with the rules resulting from the OPE TSI. The aim is to ensure the application of the OPE TSI to the highest possible extent, as well as the elimination or update of national regulations in line with the newly developed technical specifications for interoperability.

Železnice Slovenskej republiky - ŽSR

ŽSR has introduced the following national regulations in order to ensure its operation:

Z 1 "Railway Operating Rules" - the operating rules by which the ŽSR determines the method, conditions and technological procedures for the operation of the railway. They contain basic provisions for the performance of transport activities on tracks in the administration of ŽSR.

Z 3 "Professional Competence at ŽSR" – this regulation determines the conditions for obtaining, maintaining and verifying professional competence pursuant to Act No. 513/2009 Coll. of the National Council of the Slovak Republic on railways and on the amendment and supplementation of some laws, as amended, and Act No. 514/2009 Coll. of the National Council of the Slovak Republic on traffic on railways, as amended.

Z 4 “Assessment of Psychological Competence” - this regulation contains provisions on the assessment of psychological competence, in particular the conditions and requirements for assessing psychological competence; the circle of persons subject to the aptitude test; the extent and progress of the assessment.

Z 10 “Rules for the Technical Operation of Railway Infrastructure (RTORT)” - lay down the basic parameters of the structures and equipment of the railway infrastructure of main and secondary lines and special tracks in the administration of ŽSR, deal with the administration, operation, technical and safety requirements of the structures and ŽI equipment in the application of laws, decrees and TSI under the conditions of ŽSR.

Z 14 “Operating Communications Rules”- this regulation regulates the rules for the use of notification and telecommunication devices and informs about the basic types of electronic communication in ŽSR conditions.

ZS 1 “Operation of Security Devices” - this regulation determines the operating conditions for operation, servicing, operational care, inspection and maintenance of security devices on the ŽSR railway network.

SR 1003 (D) “Operational Traffic Management at ŽSR” - this regulation determines the principles of operational traffic management at all levels of management,

SR 1012 “Operating Information System” (OIS) - the regulation sets out the principles of

- entering the data into the OIS,
- the procedure for OIS malfunctions,
- interconnection of data of individual databases and OIS applications,
- interconnection of OIS with IS (information systems) of carriers,
- the responsibilities of the individual employees and organizational units concerned, etc.,
- interconnection of the superstructures ESS – GTN (Electronic Security Systems - Graphic-technological superstructure of the safety device), ILTIS (Information and Management System for local or remote operation of switching towers).

SR 1023 (D) "Creation of Track Route Tables" – the regulation lays down the principles for the development of track route tables (TRTs are an aid to describe and identify track sections (stations and adjacent track sections) and technical and operational data critical to the safe operation of traffic on the track. TRTs are organized into tables, samples of which appear in the annexes of the regulation.)

SR 1025 “Creating Tools for Rail Transport Graphics” – this regulation is valid on all railway lines, which are in the administration of Železnice Slovenskej republiky (ŽSR). It supplements and clarifies the provisions of the basic regulations of the ŽSR concerning the configuration of rail transport graphics.

V 65 “Regulation for the Operation of Flammability Indicators” – this regulation specifies the conditions for the operation of the indicator, the duties of the employees of the individual ŽSR components involved in the operation of the indicator, the provisions for the control activity.

Železničná spoločnosť, a. s. – ZSSK, a. s.

The internal regulations of ZSSK to ensure the operation of railway transport are processed according to the principles of SR legal norms and determine uniform technological procedures for the activities of the operating staff.

ZSSK Regulation D 17 - Regulation for Reporting, Records, Finding Causes of Accidents and Emergencies

It lays down the basic provisions on accidents and exceptional occurrences in the operation of rail transport on railways. It specifies the detailed category, the way of finding causes and the causes of accidents and extraordinary events, it determines the way of their reporting and record keeping in order to take measures to prevent their occurrence. ZSSK is required to ensure objectivity, expertise and independence in identifying the causes of their occurrence.

ZSSK V 2 Regulation - Performance of the Activity of a Train Driver

It lays down the basic provisions for the performance of the service of the employees in the functions of RRS train drivers and a train driver in training or in a work internship. It sets out the working procedures that are related to his / her work and the management of RRS.

ZSSK V 3 Regulation - Performance of the Activity of a Train Driver – Instructor

Specifies the privileges, duties, responsibilities and conditions for the performance of the activity of a train driver – instructor.

ZSSK Regulation V 8 - Operation and Service of Speedometers

It sets out the basic provisions on the operation and service of speedometers for RRS.

ZSSK Regulation V 10 - Performance of the Transport Activity of Accompanying Staff

Lays down the basic provisions for the performance of the service of staff in the function of a train manager, the extent of the operational and transport duties of the accompanying staff.

ZSSK V 11 Regulation - The Performance of the Activity of Train Manager - Instructor

Specifies the privileges, duties, responsibilities and conditions for the performance of the activity of train manager – instructor.

ZSSK Regulation V 15 - Operation and Service of Rolling Stock Brake Equipment

It sets out the basic provisions on the operation and service of RRS brake equipment on national railroads. The individual provisions are derived from the UIC Regulations, the Rail Traffic Code and supplemented by additional internal instructions for securing activities during the operation of transport. The regulation is binding for all ZSSK employees who carry out activities on the railway to the extent set forth in the relevant professional examination and other legal and natural persons who, who, under contract with ZSSK, perform work or other activity for ZSSK which results in the influence of traffic and transport.

Regulation - Local Labor and Safety Regulations for RRS Electrical Traction

It lays down the basic provisions for the performance of the service of a train driver and other authorized personnel (transporters of RTVs, control officers) on electrical RTVs and electrical units that are under a traction line or in its vicinity. It also

defines binding procedures prior to entry to the engine room, even when the RVC is on a track without a traction line. These LLSRs are issued as a permanent replacement for "Order B".

Regulation - Local Labor and Safety Regulations for RRS Motor Traction

It lays down the basic provisions for the performance of the service of train driver on motor locomotives, rail cars, steering wagons and motor units. It bindingly determines the work activities to be performed prior to entering the engine room of an RVC, work procedures for the operation of and work on electrical equipment (activities related to operation, replacement of fuses, inspection) and repairs (troubleshooting of electrical equipment) of RVCs, the range of permitted activities on RVC electrical equipment and other procedures for the service and operation of electrical equipment as part of the performance of the service of driver.

ZSSK Z7 - Ensuring Operation in Winter Conditions

It sets out the basic provisions for the method of ensuring the operation of carriers and the railway operator in winter conditions. The regulation is mandatory for ZSSK employees on all organizational levels, whose job classification and activities are related to the preparation and securing operation in winter conditions.

Technological Procedure - Supplementary Provisions for the Operation of ZSSK Trains and the Procedure for Emergency Stops

It sets out the procedures of the carrier to improve the safety of ZSSK trains when passengers are transported after an emergency stop, after stopping for the arrival and departure of passengers and to determine the conditions for an extraordinary passage of trains through stops with permitted stopping for the signal.

Technological Procedure - Movement by ZSSK Employees in ŽSR Railway Stations.

It defines the scope, procedure and type of activities to ensure movement by ZSSK employees in ŽSR railway stations on trains operated by ZSSK.

Measure - To ensure a change in the method of train travel by using a signal aid when giving daily signals

Directs the use of a signal aid when giving the daily Signal 113 "*Ready for departure*" and the daily Signal 114 "*Approval for departure*".

Directive - Operational Traffic Management

It sets out the principles of operational management of operation within ZSSK, the principles of cooperation with ŽSR, ZSSK CARGO, neighboring railways and foreign carriers.

7. Planning

The main objective is to provide a modern, interoperable, safe, efficient, affordable and environmentally friendly rail infrastructure to increase its use by both passenger and freight rail. Given the current state of infrastructure, this objective can only be achieved by a comprehensive modernization and renewal of railway lines.

7.1. The Scope of the Upgrade and Renewal

The scope of upgrading and renewal is ensured in most businesses through the following funds:

- a) from the own funds of ZSSK, a. s.
- b) from foreign sources.

The renewal and upgrading of rolling stock parks is carried out in the case of ZSSK, a. s. in accordance with the approved ZSSK Business Plan as part of the projects included in the ZSSK Investment Plan, and. with. (This is an implementation and medium-term investment plan).

The infrastructure manager is also trying to modernize the rail network in line with European regulations. As part of the preparation and implementation of projects for the modernization and rehabilitation of railway lines, the requirements of European and Slovak legislation concerning the interoperability of the rail system in the Community must be respected.

On routes within the territorial scope of Commission Regulation (EU) 1299/2014, which are put into service as interoperable, this Regulation shall apply in its entirety. The SR seeks to fully accept the provisions of the Regulation in question.

The modernization of the railway infrastructure will be completed by the final stage of the implementation of the Transport Operational Program 2007-2013 and by the projects within the next period of the Operational Program Integrated Infrastructure 2014 - 2020 (hereinafter OPII). Transport investments under OPII should aim at integrating the different modes of transport and building a quality infrastructure - continuing the modernization of the TEN-T Core Network.

7.2. Implementation of operational measures

The technical specifications of interoperability are applied in Slovakia to the fullest extent possible. The individual operational measures included in the internal regulations of ŽSR are based on the current technical state of the railway infrastructure of the SR, with full respect for the superiority of the European legislation.

The operating regulations of ŽSR, which are related to the procedures set out in the OPE TSI, are:

- Z 1 "Rail Traffic Rules",
- Z 3 "Professional Competence at ŽSR",
- Z 4 "Assessment of Psychological Competence",
- Z 10 "Rules for the Technical Operation of Railway Infrastructure (RTORT)",
- Z 14 "Operating Communications Rules",
- ZS 1 "Operation of Security Devices",
- SR 1003 (D) "Operational Traffic Management at ŽSR", SR 1012 "Operating Information System",
- SR 1023 (D) "Creation of Track Route Tables",
- SR 1025 "Creating Tools for the Rail Transport Graphics",
- V 65 "Regulation for the Operation of Flammability Indicators",

- track route tables (available for railway undertakings via the ŽSR web site http://www.zsr.sk/slovensky/zeleznicna-dopravna-cesta/marketing/tabulky-tratovych-pomerov.html?page_id=353)

The forms, statements related to the procedures set out in the OPE TSI are:

- written orders used on lines equipped with an ETCS device,
- track route tables.
- documentation for train drivers - ŽSR determine their procedures in the regulations of ŽSR. The railway company is responsible for drawing up a collection of Drivers' Regulations and track route tables (TRT) in international traffic. The basis is information from ŽSR regulations, TRT.

Forms, statements used in ŽSR operating procedures:

- report on the configuration of the train,
- an inventory of the train,
- Written orders - General Order, General order with pre-printed wording, General order for a track with simplified traffic control, PMD Order, A drive cautious order,
- braking percent tables.

Samples of all the forms mentioned here are in Appendix No. 2

The main mission of the group of processes at ZSSK, a. s. is the provision of passenger transport and the related activities of preparation, driving and deactivation of the train set, FGM takeover and shutting down, accompanying the train by the accompanying personnel, quality management of the operational work and the handling of deviations in transport and carriage. The operation of transport on the railways with ZSSK is governed by the rules of the SR safety regulations, the regulations of the rail operator and its own regulations. The national safety regulations are Slovak legislation, the operating rules and decisions of the infrastructure Manager, which contain the safety requirements of the existing railway system and are intended for more than one user of the railway network.

8. Financial Resources and Follow-up Activities

In the Slovak Republic, the coverage of investment costs is ensured from various sources of coverage. The financial coverage of the individual activities related to the modernization, reconstruction and construction of the infrastructure is ensured in particular by:

a) ZSRs own funds as the infrastructure manager

From its own funds, ŽSR finances investment projects and projects for the simple reproduction of assets, such as investments to ensure the operation of the railway infrastructure, to increase the safety of railway transport as well as for the traveling public, to increase the travel culture, as well as to eliminate the emergency conditions on railway lines, facilities and objects, to eliminate operational track speed limitations and to invest in information and telecommunication technologies.

c) from foreign sources:

- financing from the state budget (SR),
- funding from EU sources + co-financing from SR sources
- financing from ŽSR loans.

Resources from the SR for the modernization and development of the railway transport route are provided on the basis of a grant agreement concluded in the respective budget year between ŽSR and the MTCR SR. Funds are specified in the contract for specific investment projects. Within the purpose of use, the list includes mainly investment projects related, or Closely linked to projects and buildings funded by the EU. This particularly involves the financing of expenditure on project documentation, engineering activity, property settlement of the building, implementation of some building objects and operational complexes and the financing of expenditure not eligible for EU funding. Furthermore, investment projects related to the provision of railway infrastructure development and rail transport safety are also financed from the public administration budget. This concerns in particular the increase in safety at railway crossings.

Other railway undertakings, whether ZSSK or private carriers, finance their activities mainly from their own resources, or the results of their business activities or have the opportunity to engage in various EU-funded projects.

8.1. Follow-up and Feedback

ŽSR administers property in compliance with the law of the National Council of the Slovak Republic No. 258/1993 Coll. on Railways of the Slovak Republic. The data concerning the railway network is recorded in its information system. Railway network information should be registered in accordance with Commission Implementing Decision 2014/880 / EU of 26 November 2014 on common specifications for the Register of Railway Infrastructure and repealing Implementing Decision 2011/633 / EU. The administrator of the National Register in the Slovak Republic is the Transport Authority (address: Letisko M. R. and the ŽSR cooperates intensively in the provision of infrastructure data in the ŽSR administration in accordance with Commission Implementing Decision 2014/880 / EU.

8.2. Update Schedule

An update of the national implementation plan for the implementation of OPE TSI will be carried out "ad hoc", depending on the changes in the legislation and on the requirements regarding the adjustment of the methods and the levels of financing. Its implementation will be ensured by the MTCR SR in cooperation with stakeholders.

Conclusion

The SR is intensively engaged in the question of interoperability and considers it to be of significant importance. It strives to ensure the fulfillment of requirements in this area. It is moving towards achieving this goal by transposing and monitoring the implementation of European legislation.

The aim of this material was to provide an overview of the railway infrastructure in the Slovak Republic within the framework of the OPE TSI and on the means of financing while increasing its level. The subject of the implementation plan together with the Infrastructure register is to ensure the availability of the rail infrastructure from different perspectives. The plan will be updated on a regular basis, so that the Commission and other Member States can be made aware of changes related to the issue in question in the Slovak Republic. Member States will be informed of national implementation plans for each TSI via the MTCR SR web site. The required level of the elaborated plan was also ensured through consultation with several experts from the given issue.

TSI OPE Požiadavky		Otázka 1	Otázka 2	Otázka 3	Otázka 4	Otázka 5
		Kedy bola táto požiadavka implementovaná, alebo kedy sa s touto požiadavkou plánujete zosúladiť?	Ako je táto požiadavka implementovaná vo vašom členskom štáte?	a) Existuje nejaký špecifický predpis na národnej úrovni, ktorý sa k tejto požiadavke vzťahuje? Aký je názov tohto predpisu? b) Môže byť tento predpis vyňatý/môžeme ho nebrať do úvahy? Ak nie, vysvetlite prečo nie.	Znamená táto požiadavka, že bude potrebný špecifický prípad, alebo že bude treba vytvoriť špecifický prevádzkový predpis, ktorý by mal byť v dodatku B, alebo že by sa na toto malo poukázať ako na nedostatok/medzeru v TSI?	Kto je zodpovedný za tento proces?

Annex 4 Template ZSSK, a. s.

Požiadavka TSI OPE		Otázka 1	Otázka 2	Otázka 3	Otázka 4	Otázka 5
		Kedy bola táto požiadavka implementovaná, alebo kedy sa s touto požiadavkou plánujete zosúladiť?	Ako je táto požiadavka implementovaná vo vašom členskom štáte?	a)Existuje nejaký špecifický predpis na národnej úrovni, ktorý sa k tejto požiadavke vzťahuje? Aký je názov tohto predpisu? b)Môže byť tento predpis vyňatý/môžeme ho nebrať do úvahy? Ak nie, vysvetlite prečo nie.	Znamená táto požiadavka, že bude potrebný špecifický prípad alebo že bude treba vyvinúť špecifický prevádzkový predpis v prílohe B, alebo že by sa na toto malo poukázať ako na nedostatok/medzeru v TSI?	Kto je zodpovedný za prebehnutie tohto procesu?
4.2.1.2	Dokumentácia pre rušňovodičov	Od 01.01.2005 (vznik ZSSK)	Vysvetlenie: Predpisy a technologické postupy sú vytvorené na základe povinností vyplývajúcich z národnej legislatívy a TSI.	a) Áno X Nie <input type="checkbox"/> Referencia: zákon 513/2009. Annex 4 Template Express Group, a. s.

Požiadavka TSI OPE		Otázka 1	Otázka 2	Otázka 3	Otázka 4	Otázka 5
		Kedy bola táto požiadavka implementovaná, alebo kedy sa s touto požiadavkou plánujete zosúladiť?	Ako je táto požiadavka implementovaná vo vašom členskom štáte?	a)Existuje nejaký špecifický predpis na národnej úrovni, ktorý sa k tejto požiadavke vzťahuje? Aký je názov tohto predpisu? b)Môže byť tento predpis vyňatý/môžeme ho nebrať do úvahy? Ak nie, vysvetlite prečo nie.	Znamená táto požiadavka, že bude potrebný špecifický prípad alebo že bude treba vyvinúť špecifický prevádzkový predpis v prílohe B, alebo že by sa na toto malo poukázať ako na nedostatok/medzeru v TSI?	Kto je zodpovedný za prebehnutie tohto procesu?
4.2.1.2	Dokumentácia pre rušňovodičov	Uveďte termín	Vysvetlenie:	a) Áno <input type="checkbox"/> Nie <input type="checkbox"/> Reference: b) Áno <input type="checkbox"/> Nie <input type="checkbox"/> Odôvodnenie:	Špecifický prípad: <input type="checkbox"/> Všeobecný prevádzkový predpis/princíp, ktorý by mal byť zahrnutý do dodatku B: <input type="checkbox"/> Medzera: <input type="checkbox"/> Odôvodnenie:	RU <input type="checkbox"/> IM <input type="checkbox"/> Ďalšie <input type="checkbox"/> , Uveďte aké:
4.2.1.2.1	Drivers rule book	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:

4.2.1.2.2	Drivers route book	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.2.1.2.3	Timetables	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.2.1.2.4	Rolling stock	Click here to enter a date. 2017/2018	Explanation: Web application catalog coaches	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input checked="" type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.2.1.3	Documentation for railway undertaking staff other than drivers	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.2.1.4	Documentation for infrastructure managers staff	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please

	authorising train movements				developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	state:
4.2.1.5	Safety related communication between train crew, other railway undertaking staff and staff authorising train movements	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:

4.6.3.2	Analysis and update of training needs	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.6.4	Auxiliary staff	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.7.1	Health and safety conditions – introduction	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/>	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:

					Deficiency: <input type="checkbox"/> Justification:	
4.7.2.1	Medical examinations and psychological assessments – before appointment	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.7.2.2.1	After appointment – frequency of periodic medical examinations	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.7.2.2.2	Minimum content of periodic medical examination	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.7.2.2.3	Additional medical examinations and/or psychological assessments	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.7.3.1	Medical requirements	Click here to enter a	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/>	Specific case: <input type="checkbox"/>	RU <input type="checkbox"/> IM <input type="checkbox"/>

	- general requirements	date.		Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	Other <input type="checkbox"/> , please state:
4.7.3.2	Vision requirements	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.7.3.3	Hearing requirements	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.8	Registers of infrastructure and vehicles	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
4.8.1	Infrastructure	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:

					appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	
4.8.2	Rolling stock	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix A	ERTMS/ETC operating rules and principles – version 4	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.1	Sanding	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.2	Departure of a train	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.3	No authorisation of train movement	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.4	Complete failure of front end lights	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/>	Specific case: <input type="checkbox"/>	RU <input type="checkbox"/> IM <input type="checkbox"/>

				Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Deficiency: <input type="checkbox"/> Justification:	Other <input type="checkbox"/> , please state:
Appendix B.5	Complete failure of rear end signal	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.6	Failure of the audible warning device of a train	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.7	Failure of a level crossing	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.8	Failure of radio communication	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.9	Running on sight	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.10	Assistance to a failed train	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.11	Authorisation to pass a signal showing a stop aspect/indication	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:

Appendix B.12	Anomalies in lineside signalling	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.13	Emergency call	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix B.14	Immediate actions to prevent danger to trains	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix C.2	Communication structure	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix C.3	Communication methodology	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix C.4	Communication rules	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/>	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:

					Deficiency: <input type="checkbox"/> Justification:	
Appendix C.5	Communication terms (general)	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix C.6	Written orders	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix C.7	Terms (written orders)	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix C.8	Book of forms	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix	Elements the IM has to	Click here to enter a	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/>	Specific case: <input type="checkbox"/>	RU <input type="checkbox"/> IM <input type="checkbox"/>

D	provide to the RU for the Route Book and for the train compatibility over the route intended for operation	date.		Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	Other <input type="checkbox"/> , please state:
Appendix F.1	Minimum elements relevant to professional qualification for the tasks associated with 'accompanying trains' – general requirements	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
Appendix F.2	Professional knowledge	Click here to enter a date.	Explanation:	Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Justification:	Specific case: <input type="checkbox"/> Common operational rule/ principle to be developed in appendix B: <input type="checkbox"/> Deficiency: <input type="checkbox"/> Justification:	RU <input type="checkbox"/> IM <input type="checkbox"/> Other <input type="checkbox"/> , please state:
