

more funding for transport infrastructure investment in the EU between 2014 and 2020

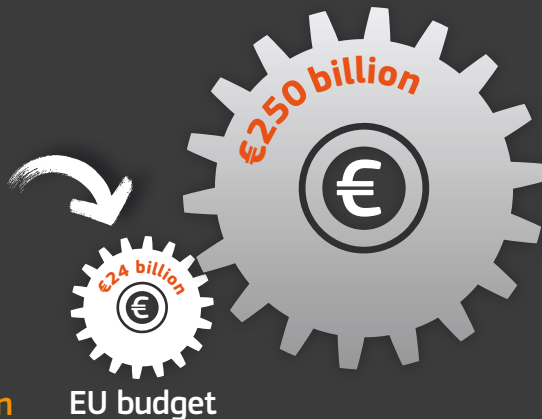

The EU tripled funding to improve key transport connections in the Single Market. The funding will focus on 9 major corridors building cross border «missing links» and removing bottle-necks and barriers.

This will contribute to transforming today's patchwork of roads, railways, airports, ports and inland waterways into a unified trans-European transport network.

EU INFRASTRUCTURE FUNDS

2020 INVESTMENTS NEEDED FOR THE EU CORE TRANSPORT NETWORK
